LA6131039	How to maintain a plasma? Why electron temperature of plasma is above 1 eV (11604 kelvin)	0.48687264	0
LA6141018	What's the physical meaning of "temperature"? Why is the temperature of people in the non-reserved-seat car higher than that in the reserved-seat car?	0.598393414	0
LA6141034	What is plasma frequency? Why we can communicate from one side of the earth to the other side using radio?	0.317746752	4
LA6141042	In what condition can a plasma be treated as a fluid?	0.573286566	1
LA6141050	What's the requirement for an electron impact ionization to happen?	0.700781294	8
LA6141068	What is Debye length? Why plasma is quasi neutral?	0.408145104	0
LA6131047	What does the plasma beta mean? Why is it important for a plasma?	0.777190393	10
C44111243	In plasma, why the "body temperature" can be in the room temperature while it is still energetic enough for some processing?	0.166982709	0
